

# Design Feedback Insights

## 1. MATCHMAKING SCREEN -

- 1.1. In duo mode, each team of 2 would need a separate color. ("We can keep the gap between different teams but all have the same color or different shades of red").
- 1.2. Grandprix mode, every time it took to finish races, would be important we should account for this. (post-game).
- 1.3. Alternate thought - report function could be tucked away with other player interactions this is a lot of real estate.

## 2. USER-PROFILE SECTION -

### 2.1. While viewing someone else's profile -

- 2.1.1. Could there be an explore more section about the user profile here or are we ok with the limit? it could take them to the achievement section perhaps.
- 2.1.2. Can create an endless loop model hair that finally leads to reaching the inventory page.
- 2.1.3. "I think this screen should have a share function."

### 2.2. While viewing your own profile -

- 2.2.1. Should look like it can be editable (on 3 accolades).
- 2.2.2. Should have the option to edit (on username).
- 2.2.3. "If viewing your own user profile, what's the use case for copying your own user ID."

## 3. CAR-STATS SECTION -

### 3.1. While viewing your own profile -

- 3.1.1. "Is this changing of accolade going to be done through a pop-up? I am not a fan."

## 4. HISTORY SECTION -

### 4.1. While viewing someone else's profile -

- 4.1.1. This should look more like each row is a representation of one race. The details are the race summary and clicking the arrow mark takes you to a detailed section of that race.
- 4.1.2. same feedback as earlier (on the report button).

## 5. INVENTORY SECTION -

### 5.1. While viewing someone else's profile -

- 5.1.1. If I can't read them, is there value in showing them to an outsider looking at my profile, doesn't serve a function (on non-tradable).
- 5.1.2. Tradable should be first.
- 5.1.3. Need a tag to show if the items are already on sale for a price (on a car).
- 5.1.4. "We should also have a drop-down for a player to select the car manually in case he wants to see any general assets on any specific car. thoughts?"
